

September 15, 2026

The Honorable John Thune
Majority Leader
United States Senate
Washington, DC 20510

The Honorable Charles E. Schumer
Minority Leader
United States Senate
Washington, DC 20510

Dear Majority Leader Thune and Minority Leader Schumer:

On behalf of Blockchain Association and the more than 1,000 Americans whose names accompany this letter, I write to urge every senator to vote YES today and allow the Clarity Act to move forward.

The individuals represented here come from across the country and reflect the breadth of the community calling on Congress to act. They are entrepreneurs, developers, small business owners, investors, consumers, and voters. They may participate in this ecosystem in different ways, but they share a straightforward request: establish clear rules that protect consumers and allow responsible digital asset innovation to grow in the United States.

Congress has spent years working toward that goal. Members of both parties in the House and Senate have held hearings, drafted legislation, negotiated difficult issues, and incorporated input from regulators, law enforcement, market participants, and consumer advocates. The administration and federal agencies have also contributed significant time and expertise. This cumulative effort has produced a framework worthy of continued consideration by the full Senate.

The status quo leaves consumers exposed, creates uncertainty for businesses and developers, and weakens U.S. leadership in digital assets. Other jurisdictions are moving ahead with their own rules. Without action from Congress, jobs, investment, and technological leadership will migrate to those jurisdictions with clearer rules.

The Clarity Act offers a better path. It would establish federal oversight for digital asset markets, require meaningful disclosures, strengthen custody and customer-asset protections, promote market integrity, and give law enforcement additional tools to identify and disrupt illicit finance. It would also provide entrepreneurs and developers with clear rules for building responsibly in America.

We respectfully urge every senator to vote YES, and give the American people the protections and regulatory certainty they deserve. American voters are watching. The world is watching. Now is the time to move Clarity forward and finish the job.

Sincerely,

Summer Mersinger
Chief Executive Officer
Blockchain Association

Attachment: Coalition Letter and Signatories

The Honorable John Thune
Majority Leader
United States Senate
Washington, DC 20510

The Honorable Charles E. Schumer
Minority Leader
United States Senate
Washington, DC 20510

Dear Majority Leader Thune and Minority Leader Schumer:

On September 15, the Senate has a choice: vote to protect American consumers and bring long-overdue clarity to digital asset markets, or allow an uncertain and inadequate status quo to continue.

Congress has spent years working toward this moment. Members of both parties, congressional committees, regulators, staff, and stakeholders have devoted countless hours to hearings, negotiations, technical discussions, and difficult policy questions. That work has produced carefully negotiated compromises throughout the Clarity Act, including on complex issues such as stablecoin rewards and protections for software developers.

We, the undersigned, are American consumers, investors, users, and participants in the digital asset economy. We need clarity and protection too. Americans should know what rules apply, what protections they can count on, and who is responsible when those rules are violated. A clear federal framework can provide those safeguards and give consumers greater confidence that the markets and products they use are subject to meaningful oversight.

After years of debate, Congress has done the hard work of bringing competing perspectives together and developing a path forward. Walking away now would squander that progress and leave the more than 67 million American consumers who invest in and use digital assets exposed to the same uncertainty Congress has spent years trying to address.

September 15 is a make-or-break moment.

A vote for the Clarity Act is a vote to protect consumers, establish clear and enforceable rules of the road, and ensure that the future of digital asset markets is built in the United States and governed by a comprehensive American regulatory framework.

We urge you and your colleagues to vote YES on September 15 and pass the Clarity Act.

Sincerely,

The undersigned Americans
